

b4

B4 is a very stylish and highly flexible beam based desking system complete with integral cable management.

The rigid interlock of the leg frames & beam together with the telescopic nature of the beam allows the leg frames to be shared. This dramatically reduces the number of components and helps minimise the cost of ownership.

The I-shaped leg frames offer a pleasing symmetry & highly contemporary aesthetic. Cabling is managed vertically in each leg frame through a covered conduit & horizontally via the high capacity trough in the telescopic structural beam. These covers have detachable cut outs for routing cables from one desk to another. The leg frames can also carry optional modesty panels.

In addition to fixed height desking, the popular shapes and sizes of B4 are offered as height settable, crank drive height adjustable and electric drive height adjustable.

technical information

- Telescopic integral cable management beam construction.
- Metal inserts.
- Leg frames:
 - I-shaped
 - Height settable I-shaped
 - Height adjustable I shaped (hand crank or electric drive)
- 25mm thick high density, top grade, E1 category melamine faced sandwich construction particleboard with square or post-formed edge.
- Silver RAL 9006 epoxy polyester full gloss.
- Height levellers.
- Optional modesty panels.
- Integral cable management.

finishes

Silver framework with:

Maple	M
Light beech	BQ
Light oak	LO
Walnut	WN
Off-white	WW
Silver*	S

**Lead time on request.*

Note that the post-formed edge is offered in light beech & maple only. Price & lead time on request.
