

The collection of conference tables, meeting tables, coffee tables and breakout tables is designed to complement our ranges of desking and storage.

A wide choice of styles and a full programme of shapes and sizes ensure a solution for every eventuality in offices, boardrooms and associated meeting rooms and conference rooms.

The choice of conference tables embraces rectangles or boats with arrowheads, round bases or goalpost shaped frames.

Most of the ranges of conference tables are offered in the compact size of 2000 x 1000mm to ensure a solution for the smallest of conference rooms.

A more expansive solution to seat 8 would be the rectangular 2400 x 1200mm table. The sizes then adopt a modular approach to combine in various ways to build large multiple-piece tables.

The meeting tables are equally versatile in creating layouts in line, in a cluster, in a ring or on their own free-standing. The various shapes are rectangular, square, trapezoidal, semicircular and circular.

Further choices are the bases. There is a style to suit virtually every range of desking. They vary from the traditional look of arrowhead bases and the contemporary style of round bases and round, tapered legs through to the I-shaped leg frames of B4 and the goal-post leg frames of Connect, Fusion, Prism and Evolution. To be used alongside all the ranges are stylish flip top and folding leg tables and cost effective folding frame tables.

All are offered in silver apart from the folding frame which is in a chrome finish. The edge profiles match the desking with square edge and, in most instances, a post-formed edge. The profiled post-formed edges are supplied on the two long sides or, for use in clusters, on just the one long edge.

Various designs of cable ports can be supplied for the table tops.

A number of the table ranges have a corresponding style of coffee tables.

For a comprehensive selection of cupboards and bookcases refer to our Standard or Systems Storage ranges.
